

SUMAN SOURABH

Product Designer | B2B SaaS & AI Products

Noida, India · +91 91550 30888 · sumansourabh9155@gmail.com · [LinkedIn](#) · Portfolio: sumansourabh.com

SUMMARY

Product Designer with 2.5+ years of end-to-end design, from 0-to-1 builds to scaling live platforms, across B2B SaaS, agentic AI, and conversational products in AdTech, HealthTech, and CMS. I own research, flows, interaction and visual design, and design systems, and with a CS + ML degree I prototype in Claude and React to validate ideas before engineering starts.

SKILLS

Design: Figma, prototyping, user research, usability testing, interaction & visual design, information architecture, WCAG

Design Systems: Component libraries, design tokens, Figma variables, documentation & governance, design-to-code parity

AI & Development: Agentic & conversational UX, human-in-the-loop patterns, prompt design, React, Tailwind, SQL, Python

Tools: Figma, Storybook, Claude, Cursor, Lovable, Miro, Jira, Linear

EXPERIENCE

Product Designer · **Shyftlabs** · Noida, India

Jan 2024 – Present

Own end-to-end design for the retail media and platforms portfolio, embedded with engineering through implementation.

Design System · Company-wide, used by [Carter](#), Atlas, Simfluent (HR recruiter platform), Tonal, SkipTheGroomer

- Architected color, type, and spacing tokens, an 8pt grid, and documented WCAG 2.1 AA components with Figma-to-Storybook parity; increased shipping velocity 30% and reduced design-code drift.

Carter · Retail-media DSP · scaling a live platform

- Led design across 12 DSP integrations as 1 of 2 designers in an 80+ person org (12-person core team); 4.6/5 usability.
- Designed an agentic AI campaign assistant (Claude API) that drafts campaigns from a brief, with human review of every section and per-network spec checks; cut launch time 3× (1.5 hrs → 30 min).
- Reworked AI budget nudges from untrusted auto-fill to suggestions beside manual controls.
- Turned the legacy ads table into an optimization view: pacing charts, alerts, one-click actions.
- Found why campaigns stalled in draft via interviews, session recordings, and SQL funnel analysis; got leadership to prioritize the fix and rebuilt the form as a short guided flow, cutting draft abandonment 8%.
- Designed a multi-DSP launcher unifying 12 workflows into one form, with one master creative auto-adapted per network; cross-network launch now takes one campaign's time. [Case Study](#)

Atlas · 0-to-1 healthcare CMS + booking · 130-clinic network · 8-person team, 2 PMs

- Solo-designed 6 WCAG 2.1 AA templates; +16% booking conversion, +41% organic traffic; reused for a larger network.
- Designed a relational B2B CMS: edit content, SEO, and reviews once, update everywhere; WCAG-safe brand theming.
- Designed a 0-to-1 no-code site builder (no engineering needed); fixed layout zones after early pages buried CTAs.
- Prototyped data flows as Claude artifacts from schemas and PRDs to confirm feasibility before Figma. [Case Study](#)
- Designed an approval flow adding 10–15 contributors beyond 4–5 internal operators, with stakeholder sign-off.

Poppins · Conversational finance app for iOS · concluded before build

- Fintech concept to hi-fi iOS prototypes: chat-led onboarding, permission-after-value flows, failure states. [Case Study](#)
- Helped decide to stop before build when the business case didn't hold.

UI/UX Design Intern · **Kraftbase** · Design studio, remote

Jun 2023 – Aug 2023

- Designed for multiple client projects, shipping 20+ designs: mobile-app mockups, marketing sites, and dev handoffs.
- Created design content for the studio's own brand and marketing channels.

FREELANCE & CONSULTING

UI/UX Consultant · **GoDiverse** · UK (remote)

Oct 2025 – Nov 2025

- Designed the end-to-end profile builder where suppliers create capability brochures to bid on corporate and government tenders, including a website import that auto-fills the brochure from their own site.

Product Consultant · **Raikar** · E-commerce

Aug 2023 – Feb 2024

- Led design and front-end with a 5-person team, taking an e-commerce brand from identity to a live React storefront.

EDUCATION

B.Tech Computer Science Engineering (ML specialization) · Lovely Professional University, Punjab

2024

COMMUNITY & ACHIEVEMENTS

- Figma Community designs copied 1,200+ times; one landing-page design replicated 500+ times.
- Led 3 public design seminars at LPU with 150–200 attendees each, including hands-on Figma sessions.
- Won the Kotlin Hackathon conducted by Google for students.
- Founded a profitable D2C bedsheet brand, earning ₹60,000 profit in its first month.
